

BLUECARD

AIM

The Bluecard is a safety awareness program that is aligned to the National Competency Standard *TLIF107C – “Follow Occupational Health & Safety Procedures”*. The course drives the key principles that when people change jobs or work environment, they have a responsibility to ensure they learn, understand and practice the new procedures and policies. The course builds the understanding that a competent person will ensure they do so.

The Bluecard utilises Level 1 OH&S Competency Standard as its signature entry point for safety & awareness training in the Transport & Logistics Industry including:

- Follow workplace procedures for hazard identification & risk control
- Contribute to arrangements for the management of OH&S
- Complete OH&S records
- Enables TLI competencies to be collated on a single card, while allowing for updates and add on competencies
- Enables fast recognition of skill levels by employers
- Improves employee access to employment
