

# Dangerous Goods Awareness

## AIM

This training involves the skills and knowledge required to handle dangerous goods and hazardous substances, including identifying requirements for working with dangerous goods and/or hazardous substances; confirming site incident procedures; and selecting handling techniques.

This training covers anyone working in the transport, warehousing, distribution and storage industries who may handle dangerous goods and/or hazardous substances.

It involves the application of the codes of practice and established procedures for the safe handling of dangerous goods and hazardous substances.

## CONTENT

- All relevant regulations and codes concerning the handling of dangerous goods and hazardous substances
- Application of relevant aspects of current Australian Dangerous Goods Code and relevant Australian Standards
- Permit and licence requirements
- Workplace procedures for handling and storing dangerous goods/hazardous substances
- Problems that can arise during the handling of dangerous goods and hazardous substances and actions that should be taken to prevent or solve them
- Identify containers and goods coding, markings and, where applicable, emergency information panels for the mode of transport storage selected
- Plan own work including predicting consequences and identifying improvements
- Recognise hazards and apply precautions and required action to minimise, control or eliminate hazards that may exist during the handling of dangerous goods and hazardous substances
- Select and use required personal protective equipment conforming to industry and Work Health and Safety standards
