

# Fatigue Management for Supervisors/ Schedulers

## AIM

This training involves the skills and knowledge required to administer the implementation of fatigue management strategies, including monitoring the implementation of fatigue management strategies; and recognising breaches of fatigue management policies, procedures and regulations.

It also includes developing and assessing staff competence in fatigue management; providing feedback to staff on any shortcomings in their fatigue management skills and knowledge; and reporting to management on the implementation of fatigue management policy. Persons achieving competence in this unit will need to fulfil the requirements of the applicable Commonwealth and state/territory legislation as well as relevant regulations covering the management of fatigue in the workplace.

## CONTENT

- Relevant codes, regulations, permit and licence requirements related to fatigue management
- Organisation's fatigue risk management system as it relates to the operational areas being administered
- Responsibilities of both the organisation and individual employees for the implementation of fatigue management regulations and policies in an organisation including suppliers and sub-contractors in the supply chain of the organisation's services and products
- Procedures for the auditing and review of an organisation's fatigue risk management system and related policy and procedures, and for reporting the outcomes of audits
- Strategies and ways of managing fatigue
- Options and resources for providing training and learning opportunities for employees on fatigue management and the implementation of an organisation's fatigue risk management system, including initial induction training, in-depth training on fatigue and fatigue management techniques, remedial training where existing competence is assessed as being insufficient, and refresher training on fatigue management
- Recognise breaches of fatigue management strategies and regulations and take appropriate action in accordance with organisation's fatigue risk management system

## Unit of competency

TLIF3063 Administer the implementation of fatigue management strategies
