

# Approved Santos Driver Training

- Maintain vehicle safety
- Local/company vehicle rules and regulations
- Hazards and risks of off-road travel
- Requirements for reporting and recording vehicle movements
- Recognising early warning signs of equipment and distinguish between causes of vehicle problems/alarms/faults
- Procedures to be followed when an incident is reported
- Responsibilities for monitoring vehicle journeys and determining immediate and follow-up actions under the system

## AIM

The aim of this course is to ensure your operators are fully competent with the on-site operation of a 4WD or 6WD vehicle. The Program is structured to provide both theory and practical driving sessions. The theory session will cover defensive driving principles, Santos site requirements, 4WD operation and recovery techniques. The Practical Session will involve but not limited to, the safe operation of the vehicle, including ascents, descents and vehicle recovery. At all times the operation will be controlled by the trainer to ensure our safety requirements are met.

## TRAINING INFORMATION

Day one is conducted in a classroom situation which provides the framework for the practical session. Each participant receives a detailed handout workbook, covering the theory topics.

On completion of the theory, each learner is provided one-on-one training with the instructor to confirm general driving skills.

This course is inclusive of the two mandatory Santos elements of defensive driving and land transport standard HSHS02.

Day two consists of the practical session, which is conducted over one full day for a four person group. It is very important that each participant receives individual instruction time.

## PRE-REQUISITES

Minimum of a 'C' Class Drivers Licence.  
All vehicles will be a manual 4WD, dual cab.

The practical session includes exposure to rough terrain and gravel, hill climb, change of tyre and the use of a recovery winch.

## CONTENT

- Prepare vehicle and secure load
- Undertake journey
- Operate vehicle
- Finalise journey
- Recover vehicle

**Units of competency**  
PMASUP236 Operate vehicles in the field
