

Bluecard Training

AIM

The Bluecard is a safety awareness program and skills passport designed to maintain consistent standards of safety training in the transport industry by building a co-operative employer/employee work environment that will promote safety and training of employees.

In this training you will become familiar with basic safety needs in the transport industry and understanding of the acts and regulations which govern safe workplace practices in the transport industry.

The Bluecard is a signature entry point for safety and awareness training in the Transport and Logistics Industry including:

- Enabling TLI competencies to be collated on a single card, while allowing for updates and add on competencies
- Enabling fast recognition of skill levels by employers
- Improving employee access to employment
