## Duration

Approximately 3 hours

## Course Development

Transqual can develop/contextualise the presentation to meet our customer's individual requirements.

## Cost

Cost on Application

For information on fees, please call 1300 554 077

## OUTLINE

This training covers:

- Explaining the chain of responsibility features in the Heavy Vehicle National Law (HVNL).
- Understanding new penalties for different levels of breach
- Facilitated and comprehensive review of key areas of your business practices, including:
  - Risk Management
  - Training
  - Assurance
  - Consultation
  - Operational Practice
  - Supervision and Monitoring
  - Equipment Maintenance
  - Management
- Action required when possible breaches of the chain of responsibility are identified.
- Consequences of non-compliance with the chain of responsibility.

## BACKGROUND

The aim of the chain of responsibility is to ensure that all who bear responsibility for conduct which affects compliance should be made accountable for failure to discharge that responsibility. In mid 2018, the Heavy Vehicle National Law (HVNL) will be amended to provide that every party in the heavy vehicle transport supply chain has a duty to ensure the safety of their transport activities. In practical terms, this primary duty represents an obligation to eliminate or minimise potential harm or loss (risk) by doing all that is reasonably practicable to ensure safety.

As a party in the supply chain, the best way to do this is to have safety management systems and controls in place, such as business practices, training, procedures and review processes that:

- identify, assess, evaluate, and control risk
- manage compliance with speed, fatigue, mass, dimension, loading and vehicle standards requirements through identified best practice
- involve regular reporting, including to executive officers
- document or record actions taken to manage safety.

## BENEFITS INCLUDE:

- Educating senior management.
- Implementing a top down culture of compliance.
- Identifying current gaps in policy.
- Identifying solutions, and
- Updating/generating appropriate internal policies and procedures prior to roll out of further training.
